

First group presentation – Week 6

You are Project Team _____ providing feedback on Project Team _____'s presentation.

Description	Rate (1 to 5)	Comments
<ul style="list-style-type: none"> Overall context of project Presentation of the current sprint user stories - set of top-priority user stories clearly described and clearly how they contribute to the client's needs; for each story of this sprint, they are testable, ensure progress for client, are bite-sized, estimable, have clients' rationale and have acceptance criteria Both functional and non-functional requirements expressed in user stories 		
<ul style="list-style-type: none"> Presentation of completed user stories (backed up with separate demo to tutor): clear description including tests matching demands of both client and discipline area. Presentation of plan for remaining user stories: mock-ups, story board...etc. of what the rest of the system or product will look like and will do 		
Quality of work done: <ul style="list-style-type: none"> Tests for each user story and for unit tests, systematic set and tools for regression testing, thorough, test-first evidence, process to ensure rigorous testing <ul style="list-style-type: none"> Testing different aspects of each user stories Test coverage: Test cases consistent with user stories and cover all user stories identified. Quality of the tests: Clearly states the test cases that need to be run, results and progress Use of relevant testing techniques (e.g. Equivalence partitioning, boundary analysis) to design test cases Testing plan – which testing will be done and why (e.g. Why are the mentioned enough), which testing will not be done and why (e.g. Why are these types of testing not applicable or needed) 		

Quality of group processes: (evidence from Bitbucket) <ul style="list-style-type: none"> • Evidence of collaboration and teamwork - group roles and sharing of work, group contract, meeting minutes (team, client, tutor), project status reports • Follow a systematic process of work - weekly plan and task allocation • “Issues” created and progress; • Use of bitbucket and slack and other previously unfamiliar tools • Work with clients - group interaction with client (screenshots of chat history, emails or reference to meeting minutes), scope statement and confirmation • Critique - what has worked well and what needs to improve in terms of teamwork, group processes and XP terms. 		
Presentation quality: <ul style="list-style-type: none"> • Speech is well structured and clear • Team is prepared – clear that they rehearsed, no reading from slides or devices • Presentation is well planned and structure • Makes good use of presentation tools (slides, demo. Etc.) – easy to read, appropriate titles, not too much text, clear and concise • All group members well-coordinated and participate (at least 2-3 members should speak, other members can answer question and elaborate). • Time - Within 10 minutes time limit, time divided well among the sections 		
Stretch tasks: <ul style="list-style-type: none"> • Explore and use broader range of tools for managing user stories, testing, group management, client interaction • Delightful and very clear presentation • Making best use of different team member skills.
